Summary

Flutter Developer with strong UI/UX design skills and hands-on experience in building cross-platform mobile applications. Developed multiple projects using Flutter, Firebase, GetX, and REST APIs with a focus on clean architecture and responsive design. Holds 2 Google certifications in UX Design and AI, and actively participates in national-level hackathons. Seeking a full-time Flutter/mobile development role to apply these skills in building scalable, user-centric products.

Skills

App Development: Flutter, Dart, Firebase, Hive, GetX, REST APIs

Coding & Development: Data Structures & Algorithms, OOP, DBMS, Java, Git, GitHub

UI/UX Design: Figma, Wireframing, Prototyping, Responsive Design

Experience

Summer Intern – Maruti Suzuki India Limited

May 2025 – July 2025

- Administered SAP Basis components in an enterprise-scale production environment, supporting day-to-day system stability and operations
- Managed user roles, transport requests, and proactive system monitoring to streamline change management across environments
- Gained hands-on exposure to large-scale system architecture and backend workflows, including system design, integration, and troubleshooting practices

Projects

CodeLink – Real-Time Collaborative Code Editor

June 2026 – Present

Tools: Flutter, Node.js, Express.js, PostgreSQL, Socket.io, OneCompiler API, Vercel, Railway [GitHub] [Live Demo]

- Designed and developed a real-time collaborative code editor using Flutter Web and Socket.io, enabling **100+ students** to collaborate through shareable links and QR codes.
- Integrated the OneCompiler API to support multi-language code execution (Python, Java, JavaScript, C++, and Dart) with live output and syntax highlighting.
- Implemented **role-based collaboration** (Owner, Editor, Viewer) with low-latency code synchronization and a scalable Node.js + PostgreSQL backend.

Vanguard – Personal Safety MVP App

May 2026

Tools: Flutter, Firebase, Cloud Firestore, GetX, Firebase Auth, Geolocator, SHA-256 [GitHub] [Live APK]

- Developed a Flutter-based personal safety application with secure authentication, OTP verification, **SOS alerts**, GPS tracking, and incident reporting.
- Designed and implemented an Admin Dashboard using Cloud Firestore streams for **real-time monitoring** of SOS alerts and incident reports without manual refresh.
- Implemented reusable GetX architecture, **SHA-256 password hashing**, permission handling, and location-based emergency reporting for a scalable MVP.

Education

K.R. Mangalam University

2023 – 2027

B.Tech in Computer Science Engineering

CGPA: 8.1/10

St. Xavier's High School

2023

CBSE – Science with Computer Science

Certifications

• Google UX Design Professional Certificate

2024

• Google AI Essentials

2024
